

# ASTREA

L O N D O N

---

"Astrea London was born with purpose: to create a modern high jewellery Maison where extraordinary stones are the beginning of a piece, never the whole story.

We work exclusively with laboratory-grown diamonds of exceptional quality, held to the exacting standards of the world's finest jewellery houses. Every creation is made by hand, and every stone is independently certified.

Astrea represents a natural evolution of the diamond industry: from extraction to creation, bringing together innovation and craftsmanship, with clear provenance and uncompromising beauty."

***Nathalie Morrison***

FOUNDER AND CHIEF EXECUTIVE

---

“What drew me to Astrea was not the technology. It was the craft, and the conviction that luxury should be able to look forward without giving anything up.

These are diamonds of real consequence, cut and set with the patience the material deserves. They are made to be worn, and to be kept.

It is a privilege to help shape a Maison that treats the future of fine jewellery as a creative question rather than a technical one.”

*Sarah Jessica Parker*

FOUNDING PARTNER AND GLOBAL CREATIVE DIRECTOR

Astrea London curates the finest, purest and highest-graded lab-grown diamond jewellery in the world.

Founded by entrepreneur Nathalie Morrison and curated by businesswoman, designer and philanthropist Sarah Jessica Parker as Global Creative Director, Astrea London unites timeless luxury with environmental responsibility, driven by a passionate mission and profound love for the beauty and quality of diamonds.

Embracing cutting-edge technology, unique and elegant design and the world's finest stones, Astrea London's mission is to bring conscious luxury, sustainable practices and world-class craftsmanship to its lab-grown diamond jewellery.

Astrea's world-class jewellery and design fuses the timeless heritage of beautiful diamonds with ethical and environmental sustainability.

Our lab-grown diamonds are among the rarest in the world and are GIA, GCAL and IGI-certified, selected from the top 1% of quality and graded D–E colour and VVS+ in clarity. Our forthcoming D IF “Flawless Collection” represents the top 0.01% of the diamond industry, offering unmatched brilliance and purity that are truly extraordinary. With advanced certification beyond the 4C's, including Light Performance and Hearts & Arrows, the authenticity of each of our stones is guaranteed.

Each stone is hand-selected by expert gemologists, certified to the highest standards and meticulously crafted into jewellery within an environmentally responsible framework. Endless possibilities of colour, cut and personalisation mean that we can realise every diamond dream with unmatched purity and responsibility, transforming each piece into timeless treasures.

For us, luxury is the union of the highest standards, artistry, passion, and perfection — created responsibly. We believe our beautiful lab-grown diamonds speak for themselves through their unprecedented quality and integrity and their brilliance, purity and craftsmanship.

Inspired by the Greek goddess Astrea — a timeless emblem of justice, purity, and precision — and the Latin word for star — our name reflects our essence — a guiding light in a new era of responsible luxury. Together we are the future without compromise.

*Nathalie & Sarah Jessica*
